

AI Audit Report

AI Declaration

I use AI tools for the following tasks: understanding HW02 requirements, creating Codex prompts, drafting Domain Testing and Boundary Value Analysis test ideas, reviewing evidence, preparing GitHub Issue workflow instructions, checking final submission regulations, and generating this audit appendix.

The dates below are estimated from the conversation order and the project working period. Exact message times were not available in the exported interaction log.

Interaction Log

No.	AI Tool	Date/Time	Your Prompt	The AI Output	Human Review / Use
1	ChatGPT	Estimated 29/06/2026, exact time unavailable	'can this be tested by script, or manually' with '2026.HW02.Domain Testing_En.pdf' attached.	Inspected the HW02 PDF and explained that scripts can be used for API evidence, while UI, mobile, security, and visual behavior still require manual review. Used as guidance for combining automated scripts with manual evidence review.	
2	ChatGPT	Estimated 29/06/2026, exact time unavailable	'in folder software-testing, prompt for codex to read testing results and write report, use English'	Produced a Codex-ready prompt instructing Codex to read existing result files and update reports in English without inventing results. Used to guide report-writing workflow and evidence-based wording.	
3	ChatGPT	Estimated 29/06/2026, exact time unavailable	'prompt for codex to use these pictures and update report' with a screenshot of FR04 evidence files.	Produced a prompt telling Codex to use screenshots inside the evidence folder, review them visually, and update reports in English. Used to integrate screenshot evidence into feature and bug reports.	
4	ChatGPT	Estimated 29/06/2026, exact time unavailable	'I have just added some pictures for FR08, prompt for codex to use these pictures and update report'	Produced a prompt for updating the FR08 report and related summary files from new FR08 screenshots. Used to update FR08 evidence and verdict notes.	
5	ChatGPT	Estimated 30/06/2026, exact time unavailable	'prompt for codex to read source code in folder eshop-sut, read all files in folder seminar, then create test cases'	Produced a Codex prompt to inspect the SUT source code and seminar materials, then create implementation-aware test cases. Used for planning source-aware test design. Final reports were still reviewed manually.	
6	ChatGPT	Estimated 30/06/2026, exact time unavailable	'prompt for codex to read all files in folder software-testing, then create test cases and put in folder deliverables'	Produced a prompt to read the software-testing folder and create deliverables in a specified output folder. Used as a workflow draft for organizing test case deliverables.	
7	ChatGPT	Estimated 30/06/2026, exact time unavailable	'prompt for codex to review all features that have "Need review" and give judgement, then update report'	Produced a prompt requiring Codex to review 'Needs Review' cases using available evidence, source behavior, logs, and screenshots without inventing results. Used to refine uncertain	

verdicts while keeping unsupported cases marked as review-required. |

| 8 | ChatGPT | Estimated 30/06/2026, exact time unavailable | 'I have just added some new screenshots, promtp for codex to use them to rewrite feature_D.md file' | Produced a prompt for rewriting and updating the Feature D report using new screenshot evidence. | Used to update the mobile checkout feature report. |

| 9 | ChatGPT | Estimated 01/07/2026, exact time unavailable | 'prompt for codex to complete everything it can in folders (follow HW02 file), and remove unnecessary files or dirs that don't follow the HW02 file' with HW02 PDF and folder screenshot attached. | Produced a comprehensive Codex prompt to complete the HW02 folder, follow assignment requirements, preserve evidence, and remove only unnecessary files. | Used for final folder cleanup and compliance planning. |

| 10 | ChatGPT | Estimated 01/07/2026, exact time unavailable | 'prompt for codex to remove test cases that have evidence: "mobile source, backend source, needs review "' | Produced a prompt to remove or revise cases whose evidence was only placeholder/source wording and not real execution evidence. | Used to avoid unsupported evidence claims in final reports. |

| 11 | ChatGPT | Estimated 01/07/2026, exact time unavailable | 'prompt for codex to use all the bugs and make github issues for them, push to git so they're visible for taking screenshots' | Produced a prompt to create GitHub Issues from confirmed bugs, update report links, commit, and push. | Used as workflow guidance. Issue creation was later limited to available confirmed issue bodies and real URLs. |

| 12 | ChatGPT | Estimated 01/07/2026, exact time unavailable | User reported 'gh auth status failed because gh is not installed/on PATH' and asked how to fix. | Explained how to install GitHub CLI with 'winget', verify 'gh --version', authenticate with 'gh auth login', and rerun Codex. | Used to unblock GitHub Issue creation. |

| 13 | ChatGPT | Estimated 02/07/2026, exact time unavailable | 'oke log in, now prompt for codex to use that and create github issues by using bugs' | Produced a prompt instructing Codex to use authenticated GitHub CLI, create issues from 'github_issue_bugs.txt', update reports, commit, and push. | Used before actual GitHub Issue creation in the workspace. |

| 14 | ChatGPT | Estimated 02/07/2026, exact time unavailable | 'command to take git commit log of current branch' | Returned 'git log --oneline --decorate' and commands for saving the log to 'git_commit_log.txt'. | Used to refresh the required commit log text file. |

| 15 | ChatGPT | Estimated 02/07/2026, exact time unavailable | Prompt describing HW02 Section 14 submission regulations and asking for a Codex prompt for final report modification. | Produced a detailed final-compliance prompt covering README, main report, bug report, AI reports, PDFs, checklist, cleanup, zip creation, and final consistency checks. | Used for final submission packaging and report consistency checks. |

| 16 | ChatGPT | Estimated 02/07/2026, exact time unavailable | 'Create a complete interaction log for this ChatGPT conversation...' | Created 'chatgpt_interaction_log.md' with chronological entries, attached files, tool actions, important outputs, and summary sections. | Used as the source file for this AI Audit Report. |

| 17 | ChatGPT | Estimated 03/07/2026, exact time unavailable | 'I already install gh, use that to create Github issues by using bugs listed' | Inspected the workspace, found the bug list, checked GitHub CLI authentication, created six GitHub Issues after authentication was fixed, and updated issue links. | Human/user provided GitHub authentication. Created issue links were used in 'github_issue_bugs.txt', 'bug_report.md', and screenshot evidence. |

| 18 | ChatGPT | Estimated 03/07/2026, exact time unavailable | Final Section 14 packaging request for '23127543_HW02_AI_DomainTesting_100/'. | Updated README, main report, bug report, checklist, issue summary, PDFs, git log, and final zip package. Marked missing demo

videos and incomplete issue screenshots clearly. | Used for final submission readiness. User still needs to review the zip before Moodle upload. |

| 19 | ChatGPT | Estimated 03/07/2026, exact time unavailable | 'use chatgpt_interaction_log.md to write ai_audit_report.md' | Rewrote this AI Audit Report from the interaction log, preserving unavailable timestamps and avoiding fabricated details. | This current report should be reviewed by the student before submission. |

Human Review Statement

All AI output was treated as draft assistance. The student remains responsible for checking assignment requirements, reviewing screenshots and logs, confirming GitHub Issue links, verifying generated PDFs, and ensuring that missing evidence remains clearly marked instead of being presented as completed work.
