

HW02 - Domain Testing Main Report

Assignment Overview

This report is the main index for the HW02 Domain Testing submission on the EShop system. It collects the selected feature reports, Domain Testing and Boundary Value Analysis summaries, execution status, bug evidence, AI usage documentation, and supporting materials required by HW02 Section 14.

No files in the SUT folder were intentionally modified for this submission package.

Selected Features

Pool	Feature ID	Feature Name	Report File
A	FR-04	Personal Profile Management	feature_A_FR04_profile.md
B	FR-08	Checkout	feature_B_FR08_checkout.md
C	FR-18	Admin Order Management	feature_C_FR18_admin_order_management.md
D	FR-20	Mobile Checkout	feature_D_mobile_selected.md

Feature Report Links

- [FR-04 Personal Profile Management](#)
- [FR-08 Checkout](#)
- [FR-18 Admin Order Management](#)
- [FR-20 Mobile Checkout](#)

Domain Testing Summary

Feature	Domain Testing Cases	Main Domains Covered
FR-04	12	Authentication, editable profile fields, protected fields, phone rules, address values
FR-08	12	Login state, cart state, quantity, checkout total, coupon use, shipping address
FR-18	12	Admin role, user role, token state, order status transitions, unsafe address rendering
FR-20	12	Mobile login state, cart state, payload contents, coupon use, network failure
Total	48	

BVA Summary

Feature	BVA Cases	Boundary Variables
FR-04	6	Phone length, first digit, name length
FR-08	13	Cart size, quantity, coupon threshold, token state, cart state after checkout
FR-18	6	Order count, status values, transition boundaries
FR-20	6	Cart size, quantity, coupon threshold, total amount around expected sum
Total	31	

Execution Summary

Feature	Designed	Executed / Reviewed	Pass	Fail	Needs Review	To be executed
FR-04 Profile	18	18	9	9	0	0
FR-08 Checkout	25	25	18	7	0	0
FR-18 Admin Order Management	18	18	5	13	0	0
FR-20 Mobile Checkout	18	17	11	6	0	1
Total	79	78	43	35	0	1

Generated API logs are stored in [test_scripts/results/json/](#) and [test_scripts/results/html/](#). Reviewed screenshots are stored under [evidence/screenshots/](#).

Bug Summary

The full bug report is maintained in [bug_report.md](#). It records confirmed bugs from the executed/reviewed cases; no feature report cases remain **Needs Review**. Six confirmed bugs have GitHub Issues created and linked in [github_issue_bugs.txt](#) and [github_issue_summary.md](#).

GitHub Issue screenshot evidence is stored under [evidence/github_issues/](#). Screenshots are available for the six created GitHub issues. Other confirmed bugs still need GitHub Issues and screenshots if they are submitted as separate issues.

AI Usage Summary

AI was used to draft and standardize Domain Testing cases, BVA cases, helper scripts, evidence review notes, and report structure. Human review was used to decide final verdicts and to keep missing evidence clearly marked.
